

PRODUCT CODE: SV100

White Plastic Rotary vent, 240mm diameter, 110mm high this vent requires a 100mm diameter hole. Protrudes 110mm above roof.

This vent draws air OUT, and it spins by the lightest breeze.

To install, remove the top cap and undo the spindle nut. The entire rotating section will remove and leave the base plate exposed. The base plate is screwed or riveted through the 4 holes provided. Silicone or caulking compound should be added to the surface to prevent water leaks.
