9kg & 4kg LCC27 Gas Cylinder

NEW

The LCC27 valve is being introduced to improve safety and reduce the risk of BBQ fires and accidental gas leakage from LPG cylinders.

LCC27 Fitting to suit LCC27 type Gas Hose fittings and an internal POL thread to suit POL style connections.
- Grade 2 Finish

9kg LCC27 Gas Cylinder - 5553
4kg LCC27 Gas Cylinder - 5557

4Kg Galvanized Gas Cradle

To suit 4.0-4.5kg gas bottle. Zinc plated.
Weld on type
238mmH x 225mm
Round

4kg Galvanized Gas Cradle - 5563

9kg Galvanized Gas Cradle

To suit 9.0kg gas bottle. Zinc plated.
Weld on type
238mmH x 325mm
Round

9kg Galvanized Gas Cradle - 5566

9 Kg Gas Secure Lock

This Wilsecure bracket is used to secure:
Dive Bottles
BBQ Bottles
Gas bottles for welders
Anything of similar size and diameter
Will secure diameter sizes of 145mm to 350mm
Can be used on:
Boats, Caravans, Motorhomes, Work Shops, Homes
Utes/Trucks/Vans

9 Kg Gas Secure Lock - 5569

9 Kg Gas Box 9 Kg Vented Gas Box Door

Galvanized steel gas box to suit 9kg bottle & 9kg gas box door. Vented. 360mm(w) x 505mm(h) x 360mm(d)

Sold Separately

9kg Gas Box - 5592
9kg Gas Box Door - 5600

**4 Kg Gas Box
4 Kg Vented Gas Box Door**

4kg Gas Box - 5594
4kg Gas Box Door - 5596

4 Kg Adjustable Gas Ring & Bolt

To suit 4.0kg gas bottles. With Zinc plated mount brackets for weld on. Galvanised holder bolted to brackets for easy replacement.

Fully adjustable and lockable
187mmH x 250mm Round.

4 Kg Adjustable Gas Ring & Bolt - 5575

9kg Adjustable Gas Ring & Bolt

To suit 9.0kg gas bottles. With Zinc plated mount brackets for weld on.

Galvanised holder bolted to brackets for easy replacement.

Fully adjustable and lockable.
210mmH x 310mm Round

9kg Adjustable Gas Ring & Bolt - 5580

4-9 Kg Gas Bottle Cradle

This gas cylinder wall bracket is the perfect solution for securely holding a gas cylinder of up to 9 kg in your caravan, camper, RV, or motorhome. Made of durable materials, this bracket is designed to withstand the rigors of the road and keep your gas cylinder upright and stable. The adjustable design allows you to customize the fit to your specific gas cylinder, ensuring a secure hold at all times.
23cm W x 6.5cm D x 8cm H

4-9 Kg Gas Bottle Lock - 5570

Gas Safety Gauge LCC

NEW

The Garth Gas Safety Gauge is the handy, low cost, all in one gas safety device that shows LPG cylinder level at a glance, detects leaks and, automatically shuts off the gas in the event of a major leak.

Gas Safety Gauge can be quickly installed to most gas cylinders with LCC fitting.

Gas Safety Gauge LCC - 5585

Gas Safety Gauge with Hose & Regulator LCC

NEW

Gas Safety Gauge with 900mm Hose and Regulator is the handy, low cost, all in one gas safety device that shows gas cylinder level at a glance, detects leaks and automatically shuts off the gas in the event of a major leak.

Gas Safety Gauge can be quickly installed to most LPG cylinders with LCC fitting. 3/8 SAE fitting and 1/4 BSP adaptor means the hose and regulator can be fitted to most gas BBQs and outdoor LPG appliances.

LPG CYLINDER SAFETY CHECKLIST

Usage:

- Cylinders used for household purposes must not be filled with automotive LPG (Autogas).
- Never use LPG indoors or in a confined space.
- Do not connect or disconnect cylinders in the vicinity of a naked flame.
 - Do not use LPG in windy conditions ie more than 10km per hour.
 - Do not use undue force to open or close the main cylinder valve. If in doubt, consult the supplier.
 - Shut off the cylinder valve before disconnecting the bottle from the BBQ.
- Always keep cool and away from flames, sparks and heat.
- When operating your gas bottle, always read the manufacturer's operating instructions.

Storage:

- Cylinders should be stored outside in a well ventilated area.
- Cylinders should be kept away from heat or direct sunlight.
- Cylinders should be carried and stored upright at all times.
 - Do not store or use petrol, flammable liquids or aerosols near LPG cylinders.
- Ensure valves are turned off firmly when not in use.
 - When transporting cylinders in the car the total capacity must not exceed 9kg. The cylinders should be transported in an upright position, secured, preferably in the boot. Do not leave LPG bottles in a vehicle unnecessarily.
 - No more than two cylinders should be carried in a car at any one time.
 - Your gas cylinder is required to be re-tested and stamped every 10 years.
- Never use a naked flame to detect a leak. To check for gas leakage, spray soapy water on any suspect connection or hose and watch for bubbles. If in doubt, turn off the gas and have a licensed gas fitter attend to the hose or connection.
- Do not attempt to refill dented or corroded cylinders. Their integrity has been compromised and must be returned to a test station for recertification.
 - Never tamper with the safety valve or
